

Mounting & Rigging Solutions

Ready to Install in a variety of colors

Mount-Ware

Allen Products Co. is a leading supplier of professionally installed audio mounting equipment, offering a wide range of universal fit, quick install loudspeaker mounting & aiming devices.

Allen designer's simple objective is to pre-engineer safe, easy to install and aim speaker mounts that expedite their installation to walls, ceilings and vertical columns.

Allen Products, and its strategically located distributors, offer standard solutions right from stock and in a variety of color choices, even for multiple cabinets and for indoor and outdoor applications.

Contractors have come to rely on Allen mount's adapting to loudspeakers and their aiming flexibility. In addition, Allen mounts are ready to install, right out of the box, and are supplied with hardware kits and installation instructions.

Choose from the following branded mounts that solve for pan, pan and tilt and pole socket rotations. You will find that there is a solution for most wall, ceiling or column surfaces. Visit the Allen Products web site to learn more about these time saving tools to make your next installations more profitable and hassle-free.

Fly-Ware

ATM Fly-Ware is the world's leader in certified audio rigging systems for both permanent and live performance applications. ATM designers have produced a wide range of easy to use, pre-engineered loudspeaker rigging systems, using domestically produced and load rated components. The result is safe and efficient installations, precise aiming and faster commissioning.

Many ATM rigging systems include standard designs available from stock and solve for single cabinets, single tier clusters and full multi-tier clusters. This ever-growing family of rigging solutions satisfy the needs for permanent and live performance applications.

A large number of rigging designs created at ATM Fly-Ware also include custom grids and trusses for use in the flying and precise

aiming of loudspeaker clusters in large venues such as, stadiums, sport arenas, civic auditoriums, churches and schools.

ATM designers understand that installation safety, reliability and accuracy are critical for maintaining safety integrity and installation schedules, which is why ATM designs are load rated and offer built-in independent aiming & locking features.

Start your custom rigging design right from the ATM web site or choose from the following branded rigging systems to solve for common permanent and live performance venues applications.

Visit the ATM Fly-Ware web site to learn more about these time saving solutions that is sure to make your next installation more hassle-free and profitable.

An ever-growing family of rigging solutions.
